NDMC goes smart, buys tree-pruning machines

SMART CITY INITIATIVE Mechanical shrub fixers, weed pullers will also be introduced for effective greening, says horticulture department

Hindustan Times

NEW DELHI: Areas under the New Delhi Municipal Council (NDMC) will soon look better next week. As part of the smart City initiative, the civic body on Friday inaugurated mechanical tree pruners with the latest technology.

"The machine, which can reach up to a height of 15 feet, has a self-propelled, hydraulically operated, boosting mechanism which will help the maintenance department to maintain trees. The machine was first operated in Netaji Park on Friday."

The NDMC area has around 45% green cover of the entire city. Out of these trees, many need proper pruning. In many places, trees grow into walls and buildings and crack them," said NDMC chairman Manoj Kumar.

Agileman tree-trimmer mechanical pruners have been bought, three more will be procured in the coming month.

"The horticulture department of the civic body is planning to bring in such technology under the smart City initiative for effective maintenance and beautification of the area."

"The technology is being specially developed by dedicated firms against the needs of the civic body."

"These machines have a high reach and can also be used for other purposes. It has been designed to take care of trees, pruners, roadsides and gardens," said a senior official from the horticulture department until then. In the coming months, mechanical shrub fixers and weed pullers will be introduced for effective greening.
